7760444422

Bangalore, India 560097

Skills

- Virtualization: KVM, VMWare, Docker, Kubernetes and OpenStack
- Cloud SDN: OVS, VXLAN, EVPN, DPDK, SRIOV, Openflow
- Automation: AI, Python, Ansible, Shell Scripting, GitLab.
- IP Networking: TCP/IP, BGP, OSPF, ICMP, DHCP, DNS, VRRP, FCAPS

Education And Training

06/2011

B.E.

Electronics and

Telecommunication

Mumbai University

Experience

Ericsson Global India Pvt Ltd-

Senior Technical Lead I

05/2024 - Current

Nokia Solutions and Networks Pvt

Ltd - Nuage Applied R&D Engineer

05/2017 - 05/2024

Ericsson Global India Pvt Ltd- Tier

2 Technical Support Engineer

10/2014 - 05/2017

ECI Telecom - Tier 2 Technical

Support Engineer

06/2013 - 10/2014

TATA Communications Ltd -

Transmission NOC Engineer

03/2012 - 06/2013

Tata Teleservices (Maharashtra)

Ltd - Telecom Engineer (APP

Trainee)

06/2011 - 03/2012

Awadhesh Kumar

Summary

Senior Technical Lead with 15 years of experience in Cloud Infrastructure, specializing in Ericsson CEE (Cloud Execution Environment) and Software Defined Networking (SDN). Strong in system integration, large-scale troubleshooting, with a focus on turning complex requirements into production-ready solutions. Designed and deployed multi-agent AI systems used internally for intelligent knowledge retrieval and automated RCA, significantly improving MTTR. Skilled in bridging support, R&D, and product teams to drive technical direction and scalable solution development

AI & Automation Experience

- Designed and developed multi-agent AI system named "SOLVE" for federated knowledge retrieval across Jira, documentation, release notes, and internal knowledge bases
- Built an advanced agentic AI platform named "LOGIC(LogIQ)" for automated log analysis and root cause identification, integrating knowledge, code, and configuration-aware agents
- Reduced troubleshooting and research time significantly (estimated 60-70% improvement in MTTR)
- Participated in EDC 2025 & 26 and Ericsson Bangalore Hackathon 2025 with these initiatives.

Experience Extract

- Owned end-to-end RCA for 100+ CEE CLD Jira cases across networking, compute, and orchestration layers
- Designed and implemented AI-driven automation tools for troubleshooting, log analysis, and knowledge discovery
- Translated customer issues and operational challenges into scalable automation and tooling solutions
- Reproduced critical production issues in lab environments and collaborated with R&D/QA teams to validate fixes before deployment
- Dedicated support engineer for 3UK TDS+ project, ensuring stability and rapid issue resolution
- Mentored interns and contributed to internal innovation initiatives (hackathons, EDC), promoting best practices and knowledge sharing
- Worked on SDN-based data center networking using VXLAN, EVPN, OVS and related technologies
- Apart from Customer Support I have also been Involved with internal CEE upgrade/installation activities.
- Have in-depth knowledge of Linux platforms, Openvswitch, SQL databases, Virtualization and orchestration involvement including Openstack, KVM, Kubernetes and Docker.
- Experience with modern data center network design using VXLAN overlay networks and SDN
